

Road Safety Week QUIZ

Every 20 minutes, someone is killed or seriously injured on a British road and each of these tragedies is preventable. Everyone has the right to safe and healthy journeys.

The great news is that the solutions to create safe and healthy journeys are known and available to us now! We must build more safe spaces for people who walk and cycle, and ensure that vehicles on our roads don't pollute our air. We need safety technology in vehicles and safe speed limits on our roads too. This is known as the 'safe systems' approach to road safety.

STEP UP FOR SAFE STREETS

For Road Safety Week 2019, we are encouraging everyone to be a leader for road safety and **Step up for Safe Streets** to celebrate the amazing solutions that will help create a safe and healthy future for us all. From street design that prioritises the needs of people not traffic, to life-saving technology in vehicles, to speed limits that reflect the safety of the roads... we can all step up to learn about, shout about and celebrate these solutions and the creation of a safe and healthy future.

Take part in our Road Safety Week quiz and find out how much you know about safe systems and road safety.

1. How many people died on roads in Britain in 2018?

- A. 1,784
- B. 1,850
- C. 25,511
- D. 29,906

2. Which country first developed the safe systems approach to road safety as part of its Vision Zero strategy?

- A. Canada
- B. Sweden
- C. New Zealand
- D. Germany
